

Research Center Portraiture FAQs

When traveling around the state, UF/IFAS photographers make time to visit RECs and demonstration sites to update the image library. These images are used in publications, blogs, social media, recruitment, grant writing, presentations, etc.

But our visit is also to benefit **YOU**. If you have ever thought, 'I could really use a nice high-resolution image of

for this presentation/lecture,' this is a great opportunity to get that shot. Please share that with your UF/IFAS photographer while they are working with you.

Do I (the Researcher) Have to be in the photos?

YES. YOU DO.

We want to highlight you and your work. We will take some images of your students working in labs and fields, but the focus is on the researcher. While we do need pictures of researchers working with students, and we will take photos of just the students (time permitting), our primary focus is the researcher.

What Do I Wear?

Please share with any students that may be present.

PREFERRED:

- UF/IFAS branded polos
- Solid colors
- Bring an additional branded shirt or jacket

STAY AWAY FROM:

- The UAA gator head logo
- white
- bold, bright colors (example: neon)
- loud patterns
- No athletic wear
- No visible logos or prominent brand names (such as Nike)

Be Mindful of Undergarments

YOU MAY BE CROUCHING, BENDING, OR REACHING IN SOME CANDID IMAGES

- **Women:** skin-toned bras with no lace, decoration, or seams are best. Fitted tank tops or shaping underwear (Spanx) are helpful.
- **Men:** Wear undershirts or tank tops under dress shirts. Wear underwear that does not bunch or shows above the waistline.
- **EMPTY YOUR POCKETS**
 - » Remove all wallets, cell phones, or keys to avoid lumpy pants
- **NO SUNGLASSES OR NAME TAGS**

What Can I Expect?

We try to get as many photos as we can while we are on site, so don't have a lot of time with each lab. Please plan to show us parts of your work that are **VISUAL** and accurately depict what you do. Examples: Take your photographer where you collect data samples, read measurements or a teaching garden/field/range that you often use. To save time, please have equipment and materials set up when the photographer arrives.
