

# Embedding videos into a post on Blogs.IFAS

*Looking to share your videos through Blogs.IFAS? UF/IFAS Communications recommends first posting the video on YouTube and then imbedding it in a Blogs.IFAS post. This will help avoid filling up the blog's media library. Also, YouTube will caption the video for you, allowing you to remain in compliance with ADA standards.*

- 1.** On a computer, go the YouTube video you want to embed.
  - 2.** Under the video, click SHARE
  - 3.** Click embed
  - 4.** A box will open – copy the HTML code
  - 5.** Go to your post on Blogs.IFAS
  - 6.** Change the post view from “visual” to “text”
  - 7.** Paste in code
  - 8.** Preview video to make sure it looks OK
  - 9.** Publish and share
-
